RAKEYSH OMPRAKASH MEHRA LAUNCHES THE OPEN PAGE ONLINE PORTAL & STUDENT REPORTERS' CLUB

The Open Page & Yuva Unstoppable hosted the event "Lunch with Mr. Rakeysh Om Prakash Mehra" on 30th May 2015 at Hotel Novotel in Ahmedabad. The famous Director, Producer, Writer & Film Maker of Blockbuster movies like 'Rang De Basanti', 'Bhaag Milkha Bhaag' & many more was the chief guest at the event. In the event Mr. Rakeysh Om Prakash Mehra had launched The Open Page Online Portal & Student Reporters Club.

Mr. Rakeysh Mehra interacted with audience on youth mobilization and girl hygiene awareness & also shared his thoughts. During the event

Mr. Archit Bhatt the Managing Editor of The Open Page honoured the guest Mr. Rakeysh Om Prakash Mehra with the The Open Page Memento. Mr. Amitabh Shah, Founder of Yuva Unstoppable was also honoured with The Open Page memento.

In his speech, The Open Page Managing Editor, Mr. Archit Bhatt, had briefed about the most popular, The Open Page newspaper & also regarding the launching of The Open Page in vernacular language, Gujarati to reach across the readers in Gujarati medium schools.

Ahmedabad Municipal School Board's Chairman, Mr. Jagdishbhai Bhavsar had also graced the event with his presence. The Trustees, Directors & Principals of the most eminent schools from various cities like Ahmedabad, Baroda, & Rajkot had graced the event with their presence. Mr. RakeyshOmPrakashMehra had honoured all the invitees with The Open Page memento. The children from Sarjan NGO had presented a dance which had won the hearts of all.

FRIENDS, ENJOYED VACATIONS??? NOW GET READY, 'BACK TO SCHOOL'

It's school time again! Oh! no, back to school?

'Mom I will not go to school now.'

"Vacation was so much fun, it just seemed that the vacation had started and it ended also. It's back to school time. Mom I am not going to school, right now."

Dear friends, now that the school will begin again you probably will say no to your mom. Isn't it!!! Am I right?? But friends let me tell you that, it's like after day it's night and back to day, this sequence will go on...School starts then again Diwali vacation, Christmas vacation, so such big and small vacations will come and go. We have enjoyed vacation with family & friends. We might have gone on trips, enjoyed it too, so now when school starts we have to go back isn't it?

You're probably feeling excited and maybe a little sad that summer is over. Some kids feel nervous or a little scared on the first day of school because of all the new things: new teachers, new friends, and maybe even a new

THIS PICTURE REPRESENTS SYMBLOZES

school. Luckily, these "new" worries only stick around for a little while.

You must have enjoyed a lot during vacation. Some of you might have visited grandma's home, or went on trips with family, few must have gone on trekking or school picnics and many of you have learned a lot from summer camps. All of you must have relished on mangoes and other favourite food. Besides these, you must have enjoyed watching IPL cricket matches as well.

All of you are smart, so before school starts you must have already bought new school bags, textbooks, notebooks, compass box and are ready to go to school. Now that you are entering higher grades, you should not forget to prepare yourself for that too. While busy playing in the vacation, many of you might have forgotten to prepare for school's new academic year. Some of you might have felt that there is still time, but friends why should you wait. You can sit with your mom, dad, brother or sister and should have checked listed and prepared. This list is a must so that you don't leave out any. Friends, before you start the new session in school, take the blessings from God, Goddess Saraswati, parents, and grandparents.

When you start school, take blessings from your teachers also, they are your gurus. Respect and obey them. Mark my words the whole year will be very fruitful and you will academically succeed.

Ok Friends, The Open Page wishes all our readers Best of Luck for the new academic session. Give your best and move ahead with success. Study hard and make your parents proud.

Best wishes & Regards

HAPPY ENVIRONMENT WOULD CREATE A HAPPY STUDENT AND A HAPPY EDUCATOR

It is rightly said that a child is the reflection of an adult, because a child observes and acquires learning from the environment around him.

He enters his classroom fully prepared, physically and mentally, with preconceived plans, according to his perceptions, from his observations in the surroundings. The child is powerful in his observations and a quick learner. He is able to catch the whole picture immediately. As an adult everybody would accept this fact. Then why are we not able to provide a positive and the right environment for the child to learn? Why are we not showing the correct picture? We are the idols for the child's learning. Do our verbal and non-verbal behavior create a positive learning environment for the child? It is very important to reflect on the above concern.

It is the educator who can provide a happy learning environment, not only for herself but also for the child. To maintain discipline in the classroom, why should an educator yell and lose her temper for it? By yelling and losing temper, is the discipline maintained! Most of the time the situation worsens. A lot of time is spent in maintaining the discipline, instead of spending time on discussions and interactions that enable learning. To maintain discipline, the educator should provide a vibrant and interactive session. The educator has to be active, thoughtful, calm and composed, not only while speaking but also while listening. She should be a good listener too. She should analyse the behavior of the child and take actions which enable or provide an opportunity to the child to correct his behavior. Her words and behavior, should reflect positivity. She should also choose appropriate words while speaking to her students. To maintain discipline the educator should avoid the following: why questions, the word 'you' said in a harsh tone, the words 'no' and 'don't', lecturing and berating. Instead of yelling to the students, 'don't do this' and 'you can't' and 'no', she can calmly instruct the students for the correct behavior. Students don't listen when he/she does not know the reason for the 'don't's and 'no's. An interactive class with a thought provoking topic for discussion would help a lot in maintaining discipline.

As written in the beginning that the child is the reflection of the mentor, the educator who is a mentor, if can groom properly, would be able to produce a better citizen for a better tomorrow. The education which is given in the initial period is deep rooted and, grows successfully. An happy environment would create a happy student and a happy educator.

BEHAVIOR OF STUDENTS IN THE CLASS

The flower of academics blooms in fullness when knowledge and virtues move hand-in-hand. Knowledge alone cannot shape up the total personality of a student unless it gets a blending of moral values. Needless to say, if one is the beauty then other the fragrance.

The unbridled youth potentials can be harnessed by the reins of discipline and ethical perfection. Sad to say, nowadays the progress of a person is evaluated by his economic growth. In modern time, the moral values, ethical perfection, virtue of excellence etc. are the talk of yesteryears.

In Vedic era when a knowledge-seeker was entering the doorway of Gurukul, he was totally surrendering himself to the Guru just to receive from him the nectar of knowledge. For a certain span of time he had to stay there and after taking permission of his master either he was accepting the lifestyle of a householder or a life of renunciation.

Let us think what we can do the best in the present situation. The special classes of

value education should be introduced to make education more value-oriented. The basic values of truthfulness, non-stealing, celibacy, study, purity, contentment, devotion etc. should be inculcated in the minds of students. Some lesson-giving stories and prayers should be added in the contents of textbooks. Good skits, elocutions, calligraphy etc. should be conducted to unfold the hidden talents of students. The virtue of filial reverence must be inculcated in knowledge-seekers. These moral values will certainly broaden their horizons also.

A bit of change may do a lot of improvement! The vision, mission and core values of educational institution should not be on the pages of chronicle only but these values must be put in to practice to change the behavior of students for his success and for institution's reputation.

It takes a great man to give sound advice tactfully, but a greater to accept it graciously. ~ Logan Pearsall Smith

HASTA LA VISTA

The term "Hasta la vista" is a Spanish farewell that can be literally translated as "Until the (next) sighting" and means "See you later" and "Goodbye". The author has used the title with reference to the vacation, where students and teachers leave and come back to resume academic operation to a new high.

As a teacher myself, I am a much better student, being blessed to learn valuable lessons from my parents, teachers and am open from my students too. They strengthen the learning process in the interest of the student community. The majority of students and teachers are excited to go back to school, although a greater number wished that summer would last a little longer. A very small percentage is not prepared for classes and a slightly larger percentage doesn't want to go back to school at all. Many people looking at a student's schedule are envious of the vacation periods. Statutory holidays, winter and summer vacations, where other people may find themselves working.

When teachers have geared up to start the process all over again every Session/ year with energized vigor and vitality; changing the mere syllabus completion concept by that extra leap to execute better understanding, accomplishment of knowledge quotient, it is time for the students to showcase the investment done in terms of time, knowledge, behavior, etiquettes, vocation and concern towards family, needy, and society. Invest time, relish returns.

Making school a facilitator and/or an enhancer to groom learning, is in the hands of the students and teachers individually and collectively. Some of the common attributes

- Self discipline, self assessor, introspect
- Proactive attitude always positive
- Work to work
- Respect teacher - parent – world - student relationship
- Interpret communication to helpful perception

Listed below are some of the following considerations, many students proactively make:

1. To see friends again with the sense of belonging to the close-knit schooling community.
2. To make new friends or, form a new group amongst them
3. To get back to a timed schedule.
4. To be extra vigilant and careful in deeds, dealings and duties
5. To showcase understanding and responsibility, through the vacation homework submission
6. To be even more studious and curious on to knowledge acquisition
7. To learn something unknown, something undone, something unseen before

8. To make oneself bigger and better than before through fun loving learning procedures

9. To deliver as expected by authorities and as dreamt by positive self

10. To reach out to the weaker students and helping them to adjust to college life and academics

11. To pose questions (if not , then by digging exercise by the faculty), understanding concept

12. To share knowledge to enhance it

13. To be an active participant in curricular and

It is time for the students to showcase the investment done in terms of time, knowledge, behavior, etiquettes, vocation and concern towards family, needy, and society. Invest time, relish returns.

extra-curricular activities

14. To represent and take self and school to a greater validation

15. To groom towards a better citizen in the society

16. To have worked upon the weaknesses and threats by school parent's advice

17. To concentrate on performance more than percentage, and acquire more percentage

One in many students in every smaller group, experience the fear of either of the elements at their workplace. And you are the best judge to say what you fear from. It can range anything from waking up early, breakfast, friends, studies, writing, homework/project assignment, majorly exams and above all teachers thereby inventing excuses to bunk classes. You have utilized the session extended to the vacation gone by towards enforcing yourself to fight fears of most, but school as a whole. Don't feel conscious when you do anything just be cautious. It doesn't matter at what pace you perform, just deliver it right.

She /he are brave if they stand there to find a solution to the problem than bank on someone to propose and enact it. Solution can be sought through again a list – family members, close friends, relatives, grandparents, neighbors, seniors at school and even teachers (only if you

want it from them). But most importantly you are the one who has to execute the formula on to yourself to be better and grow ahead by each year passing by. When you sit back after every year, you feel it was a shorter span but loads of learning and all the lessons are memories to cherish for lifetime. So do it, for they are precious for every individual student's career. The reason for your services in schooling is improvise like the wine matures by time, you do so.

Now the biggest perk to come back to school. What's in store? Every individual wants something new, refreshing and add-on value pack every time and here the student's situation is no exception. The students can look forward to the following list and others can be explored at your end:

- NEW books, new teachers teaching, new academic inclusions like a new language, new aspects developed by school authorities for the students like digital learning aid, new friends, new project works, participation into various intra and inter level both curricular and extra-curricular competitions to showcase talent, be a part of various occasions to be observed.
- **IMPROVED** attendance, improved student's management of classes and thought process, improved student's inter personal skills, improved achievement potential and attachment towards the school, improved confidence, improved speech (especially Hindi and English), improved writing skills, improved reading skills, improved understanding, improved knowledge sharing with teachers, improved inquisitiveness, improved scores, improved SELF.
- **FEWER** disciplinary issues, fewer problems.

Dear Students,
Greetings!!

Hope you had a thunderbolt vacation and looking fresh and ready. I managed to list a few things you are about to encounter, explore and experience by going back to school. I think some of the aspects that actually existed in the education system (addressed above) were not aware, but now you know. I can say that now you have more than a dozen reasons to be benefitted, by resuming your services as a student studying your way towards a responsible citizen of the society.

CARE YOU TAKE AT THE ONSET OF THE NEW ACADEMIC YEAR

teacher sees in the tail-ending days of life, the child sees in the beginning of his life and this is called the generation gap. Education blended with essential values bridges this gap.

Discipline plays a vital role for running school smoothly. Punctuality, regularity, study, honesty, truthfulness, non-stealing, austerity, purity, contentment, etc. are essential

virtues for overall development. Children are just like buds and when these buds uncurl they produce fragrance and beauty as well. Every child is having some latent talents and he requires the opportunity to unfold his talents in fullness.

Try to keep a safe distance from lethargy and do your day-to-day work regularly. For example, if you eat daily one piece of bread less for a week and then try to make it up by doing overeating then it will create

indigestion. Similarly, if you carry out your academic schedule in the same fashion, then it will create tension and confusion. Reading is a good habit and it broadens the horizons. It's a food for thought and brings clarity in the mind. Needless to say, "Swadeshe Pujiyate Raja, Gyani Sarvatra Pujiyate".

A king is honored in his own kingdom, but the genius or learned gets honor in the whole world.

School administration is a challenging job and the person holding the top post strains every nerve to prove himself a right

THIS PICTURE REPRESENTS SYMBOLIZES

Discipline plays a vital role for running a school smoothly. Punctuality, regularity, study, honesty, truthfulness, non-stealing, austerity, purity, contentment, etc. are essential virtues for overall development

person. It is easy to shape up your destiny but really difficult to shape up the future of all children who have given their reins of life in your hand.

The sun of summer vacation is at the zenith. Soon the busy days will be here again and schools will regain its life. The cacophony of voices and noises will return back at the onset of June. The giggles of tiny tots will be in air.

The academic bigwigs have to think twice, 'what to do & what not' because the rising graph of rankers may bring lines of joy on your face but its fall may bring the lines of worries. One should not inflate his ego if success comes in his favor. Strive on to be better than the best and for that don't rest on your laurels but spread your wings to fly high in academic sky.

If little success or failure knocks the door, don't hesitate but welcome it. Carry out introspection and be ready to do improvement. A bit of changes may bring lots of improvement. The journey to be at the top begins from first step. As the saying goes, teacher is a life-time learner, it is advisable to update the knowledge because whatever the

What is more pious than a living Goddess i.e. Mother. Obviously, it's none other than mother. The incarnations of God and demigods in all religions have a great respect for their mothers. Look! Just have a fleeting glance of Mother India, how patiently she passed the days of slavery and gave us the free air of liberty to breathe. Needless to say, no one can be greater than Mother.

We can watch both the contradiction and consistency on her face. When her child cries at the time of birth, she smiles because of joy and after maturity when he laments, she shares and sheds tears from her eyes. No one can overshadow the love of mother because it is unconditional with no expectation.

If we turn the pages of scriptures, an inspirational story will make us a bit emotional and also bring tears in the eyes. Long back a boy whose name was Shravan Kumar carried his parents in two baskets, well balanced on his shoulder and he travelled across the country to perform the Chaar-Dhaam-Yatraa just to show the holy shrines to his parents. Sad to say, in this modern era, no better-half will permit her husband to do so. Even the great Pandavaas of Dwaapar Yug followed the order of her mother when she mistakenly asked her sons to share the Draupadi amongst them. Lord Krishna had given immense love and reverence to his real mother Devaki and also to his caretaker mother Yashoda.

Mother is the holy character who maintains

the creation of this terrestrial abode. As per Hindu religion, if any relative meets with Sanyaasi, he is not allowed to show any sign of either love or reverence but if his mother comes in front of him he has to bow down just to express his respect.

The celebration of Mother's Day began from United States in early 20th century. Most of the countries celebrate the Mother's Day in the month of May but somewhere the date varies. This celebration started with the intention to develop a filial love and reverence especially for mother.

Most of the countries observe Mother's Day on the second Sunday of the month May, but some countries observe on different dates. India, Australia, Bangladesh, Brazil, Canada, Greece, Italy, Japan, Sri Lanka, United States, etc. celebrate Mother's Day on the second Sunday of May. Hungary observes it on first Sunday of the month May, Indonesia observes it on 22nd December, Russia celebrates on 8th March, Sweden observes Mother's Day on the last Sunday of May.

When the son takes the first breath just after birth then his mother will be present there to attend him. So, it's a moral duty of the son to be at the feet of mother when she breathes the last. We should have great respect for our Motherland and Mother tongue as well. Let us say loudly in one voice, "Matru Devo Bhava" and let the voices echo in each nook and corner of the world.

You may be deceived if you trust too much, but you will live in torment if you don't trust enough. ~ Frank Crane

THIS PICTURE REPRESENTS SYMBOLIZES

ACTION PLAN FOR THE NEW ACADEMIC YEAR

The new academic year begins with fresh zeal, brimming enthusiasm and new friends. Though the indelible memories of past year often come and amuse us, sometimes we think why the time flies. Let it be static. But hours roll into days, days into months and so in years. It's a law of nature and it cannot be changed. So, it is good to say a parting goodbye to the outgoing year and give to the new year red carpet welcome. So, the new academic year is about to come with showers of rainy

season. Let us widen our horizons by updating our knowledge. Faculties of science, commerce and arts are just like a troika which is pulled by three horses. First of all we should decide our ultimate goal and then a set of short term goals should be made to accomplish the final goal.

Parents should give free reins of choice in the hands of wards to choose their line for study as per their liking and inborn qualities. The subjects chosen by parents mar the joy of reading in students. After selection of faculties and subjects it is the

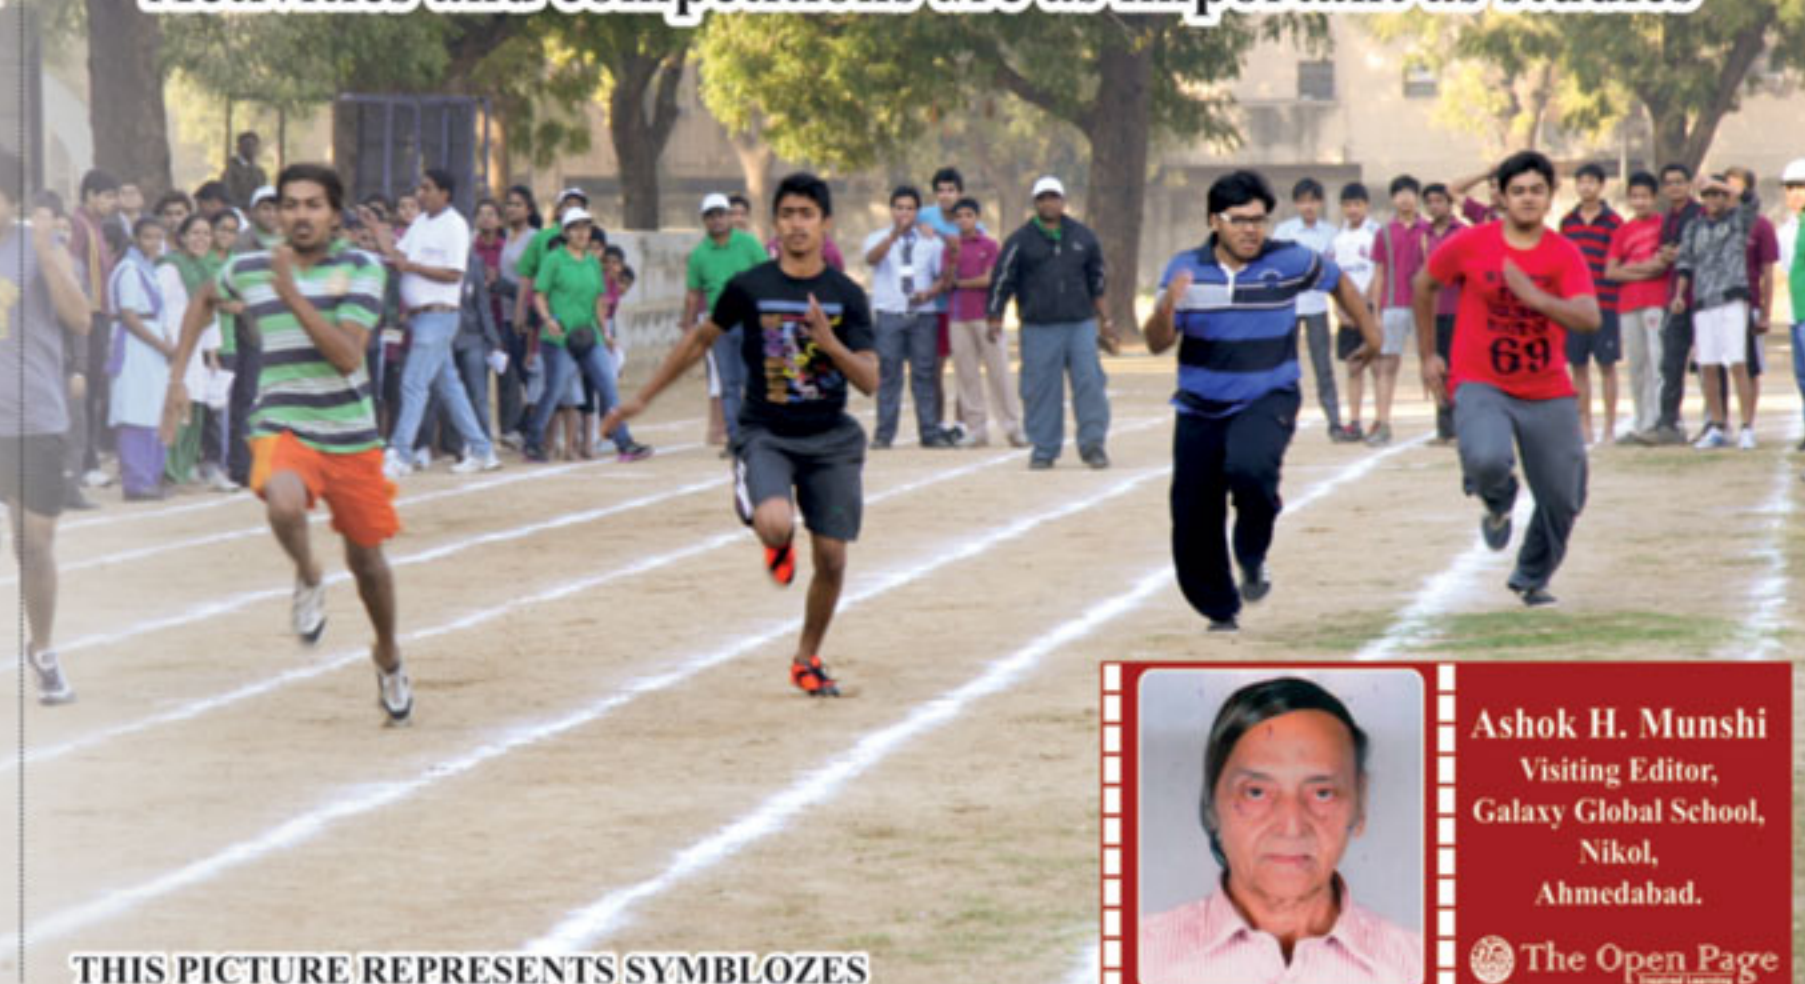

responsibility of every student to be serious towards his studies for building his or her career.

Educators are the role models for their students and they are the sources who can shape up the personality of learners. An action plan must be prepared at the onset of academic year to complete the syllabus in the given limit of approximately ten months. The lessons should be divided and taught in the decided span of time. The planning works quickly when it is followed systematically by implementation. Hollow words can't do miracles unless they come into action.

Activities and competitions are as important as studies. So House System with four house animators and house captains should be introduced to run the school activities and competitions in a well-planned manner. The activities and contests like elocution, skits, games, martial arts, singing, dance etc. should be conducted to enhance the zeal of students. It also removes the stage fear of students and unfolds their hidden talents to expose it in fullness.

When deciduous season comes then the leaves of trees fall and soon the trees regain their beauty by wearing a green garb of new leaves. So, do not get disheartened if the outgoing year did not favor you. Click your heels again to walk once more on the path of success for attaining the new heights of success and fame.

Activities and competitions are as important as studies

BLOSSOMS PRIMARY SCHOOL

"ROZI KUNAD", NEHRU BRIDGE CORNER, KHANPUR ROAD, AHMEDABAD-380 001.

PHONE : 079-2550 0363 | 2550 3441 | www.blossomsprimaryschool.in

The school is a Gujarat Government Recognized school upto Std. VIII, and may still be growing further. Rose Buds Playgroup bloomed into Blossoms Primary School in the year 2006. It is a co-education school. School is a temple of learning. We develop learning skills that include not only education, but discipline, hard work, life-skills and overall personality, so that students become responsible members of society. They are taught how to be useful and good human beings. They also learn to speak English fluently. Yoga class helps them to remain mentally and physically fit. Students take part in different competitions such as drawing and handwriting of Navneet and Creative Art Education. The Diwali week is celebrated before vacation by different competitions such as Rangoli, Drawing, Mehendi, Quiz, Antakshari. Model Exhibition of different fields of Science such as Electricity, Hydro-Energy, Wind-energy, Rainwater harvesting, Geo-Science was open for parents for a week. These wonderful and creative models were prepared by the students of Blossoms Primary School with great enthusiasm. Blossoms Primary School organized an Annual Day in February this Year at the town hall. Parents were given a warm welcome. The theme of the programme was "Incredible India". It is remarkable that inspite of having different religions, traditions, culture and languages in our country, we remain as one united nation. Our Prime Minister Narendra Modi's project of Swachhh Bharat in our country was performed on the stage by the students. There is a saying, "Cleanliness is next to Godliness". Students are taught to keep their classrooms, home and surroundings clean which would help achieve the goal of Swachhh Bharat. The last item showed the efforts and the sacrifice of our great leaders who fought for freedom and achieved independence through non-violence. For more information, please visit our website

VALUES, ATTITUDES & BEHAVIOURS

THE ESSENTIAL ENVIRONMENT

On entry to school a child brings a frame of reference which comes from his or her experiences prior to school, mainly gathered from home. Parents or caregivers have provided opportunities to explore some things and not others, so that he or she knows a lot about a limited number of personal experiences. The language used mirrors that of parents or caregivers, and emotions are the product of intense experiences with significant adults in the first years of life.

In coming to school the child brings a range of ways of responding to new situations, some of which will be useful in school, others less so. No child comes to school who has not learned anything, and it's the teacher's responsibility to find out what it is that a child knows and what skills have been acquired, and build upon this foundation. Children are complex, and their cognitive development is complex, and teachers must learn to observe continually what is happening as children come to learn new ideas, skills and values.

In school, children are faced with a range of tasks that may be very different from the tasks and problems they had to solve in their play and in their interactions with others in their community. Some children may never have held a pencil before; others may never have seen a book. Others may not speak the language which you, the teacher, speak. How important it is, then, to ensure, in as many ways possible, that you can build lots of support between what children already know and can do well, and the new tasks which school demands!

Some ways of building links for learners.

Two of the earliest expectations which children (and their parents) have for school, are to learn to read and to use numbers. When children come to school, there are some simple tasks which you can plan so that children will be successful from the first day.

- With children, label objects in the room (in a

language that the child uses) with the names that we give them: desk, chair, children's names on desks, blackboard, numbers grouped with figures, which children can associate the objects with the words that stand for them.

- Make sure you tell each child at least one thing that they can do every day for the first few days of school.
- Write out the words of a song which children already know, or can learn quickly, and see who can guess which words are which.
- Be clear in giving directions in the classroom, and organise older children to help younger children understand the direction that you give.

If a new child arrives in your class who cannot speak the language of the other children, seek out other children or even others in the community who can make the links between his or her language and the work of school. In this situation, it will be very important to take the time to find out what this special child can do. It will be useful if you can learn to speak to the child individually, and by name, and if necessary in their own language.

By establishing simple tasks for achieving success right from the start, even the most timid child can be off to a good start, confident that school is a good place to be, and a place where he or she can learn. This is very important.

It's the teacher's responsibility to find out what it is that a child knows and what skills have been acquired, and to build upon this foundation

EFFECTIVE LEARNING THROUGH HAPPINESS

The most important element in the learning environment is invisible. It is made up of the values, attitudes, and actions that we and our classes take part in every day. As a teacher, you can exemplify the values that lead to intellectual curiosity and learning, and you can foster those values in the children in your class.

The ways that you interact with children can establish the classroom as a place that nurtures investigation and experiment, hard work, and appreciation for the unique abilities of each learner.

The ways that you set up for children to interact also contribute to the daily creation of the learning environment.

Are children put into competitive situations? Or is co-operation the most valued activity? Are children asked to support each other's learning, or are they asked to learn in isolation? As a teacher, you create structures - in the form of learning activities - that channel and shape communication between children.

Key considerations

There are many factors to be considered in making your classroom into a positive and supportive learning environment.

Treat all learners equally.

When you are fair in your treatment of children in your class, they understand that you care about the success of each of them. Call on girls as often as you call on boys, and support their answers with rewards and guidance.

Go out of your way to pay equal attention to learners from minority ethnic groups or who are new to your school.

Create opportunities for every student to experience successful learning.

Encourage participation.

Believe that every student in your class can learn. Make it clear that your expectations are high - that learners will focus on learning activities, that they will share information, and that they will ask for help when they need it.

And make it equally clear that you see that when learners behave in ways that promote learning, you will respond with support and encouragement, even when they encounter challenges and obstacles.

Establish structures for learning.

Children (like the rest of us) learn best when the learning is dynamic and active, but when it takes place in a context of order and stability.

Create a chart of class jobs and responsibilities, to enlist children in keeping their classroom clean and organised. Post and discuss rules for co-operation and working in small groups. Establish a system that children can practice and rely on.

Describe and demonstrate the behaviours that you expect from your class.

Organise the presentation of lessons and activities. When you are confident and competent in your presentations to the class, you lay the foundation for effective learning. Prepare materials and review lessons in advance to master the information and skills at the core of the activity.

Guide discussion toward clear goals of understanding. And make the goals of lessons and activities clear to learners at each step in the learning process.

Avoid negative communication.

When you yell at a child, you destroy the environment that nurtures learning.

When you are sarcastic, or belittle a learner's efforts, you discourage that learner from responding again.

When you scold children harshly, or humiliate them - whenever you expose them in front of others - you endanger the trust that they place in you.

ADJUSTING TO THE NEW SCHOOL YEAR

THIS PICTURE REPRESENTS SYMBLOZES

The first day of school can be scary. Children wonder about how everything will go—“Will my friends still like me?” “Will I fit in?” “Do I look good?” This is normal and usually goes away within a few days. For some kids, though, it doesn't subside as quickly as parents would hope. For these children, parents may need to provide a little extra support. In general, the types of problems children have with adjusting to the new school year revolve around academic, social, or emotional issues. Here's a look at each.

- Academic problems may stem from the fact that your child is working with a new teacher. Last year's teacher learned that he needs structure and predictability to pay attention, but does this year's teacher know that? The expectations may be much greater this year than your child was expecting. For example, he might

have forgotten some math skills over the summer, and his new teacher expects that he already knows them well. Some teachers have very active, busy classrooms,

THIS PICTURE REPRESENTS SYMBLOZES

but your child works better in a quiet setting. Any one of these might be causing him to dislike going to school. The trick is to figure out what is causing his

frustration and talk to his teachers about it.

- Social issues may be keeping your child from adjusting to the New Year. If she tells you that she

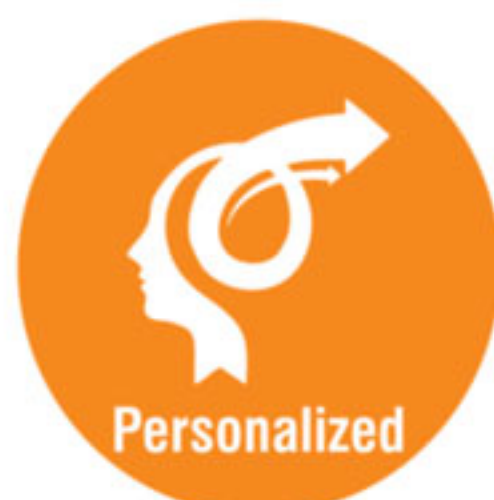

the skills to make new friends. Experts agree that children do not need to have a lot of friends to be healthy, but they do need at least one good friend. You can help your child make new friends by role-playing how to talk to someone new. She needs to practice asking questions like “Did you go anywhere during summer vacation?” or “Where did you go to school last year?” Conversation-starters like these can help break the ice.

If your child switched schools, she may be missing her friends from last year. It's important to let her get together with her old friends, but she should also be making new friends at school.

- Emotional issues might keep your child from adjusting to the new school year. He might be more afraid of change than others are. If you know this ahead of time, try to take him to the school to visit before the school year starts. If he is moving from a small building to a large one, he may feel insecure. It can take several weeks to feel comfortable getting to the right place at the right time. His teachers might be able to find a friend who can help him if needed.

It is possible that your child's trouble adjusting to school has nothing to do with school itself. It might be coming from home. Consider whether anything in the household is the source of stress, like a recent move or a new baby. Whatever the cause, the key to a successful year in school is communicating with your child's teacher. Ask her why she thinks your child is having trouble adjusting to school, and how to best solve the problem.

The Open Page

The person you see daily in the mirror is the key to your success

At The Open Page Student Reporters Club's launching, the Open Page Reporters Club's students had interviewed the famous Bollywood Director & Writer Mr. Rakeysh OmPrakash Mehra during which Mr. Rakeysh Mehra had shared that the key to success is the person you yourself whom you see in the mirror daily.

best. Work hard, give your best & motivate yourself. Further the students asked.

"Sir, can you please suggest if students like us should pursue Film line career?"

To the above question Mr. Rakeysh OmPrakash Mehra replied "There are many openings in this field such as: Producer, Director, Actors, Camera man, Makeup man etc. A person needs to think where his/her interest lies. We should always follow our hobby and never select any line under anyone's force / pressure."

"Sir, you had privilege to work with famous actors like Amitabh Bachhan, Aamir Khan and Farhan Akhtar, can you please share how was their behavior and your experience to work with them?"

To the above question Mr. Rakeysh OmPrakash Mehra replied "We learn lot many things from the actors. When I worked with Amitabh Bachhan he taught me many useful things. Even I enjoyed with the singers A.R. Rahman, Lata Mangeshkar, etc. I also learn from the new comers. The representatives from The Open Page Reporters Club were the students like Yesha Parikh (H.B. Kapadia School), Devansh Bhadoria (Anand Niketan School), Radhika Mehta (Tripada International School - Cambridge Section), Azriel A. Reubens (Reubs School), and Kairavi Nayak (Tripada Day School) who interviewed Mr. Rakeysh OmPrakash Mehra.

Mr. Rakeysh Mehra was very much impressed by the student's interaction that he came forward and honoured the students with memento.

The Open Page Reporters Club's students had interviewed the famous Bollywood's Director & Writer Mr. Rakeysh OmPrakash Mehra

To the above question Mr. Rakeysh OmPrakash Mehra replied "Only oneself can be result of one's own success. The person you see daily in the mirror is the key to your success. There are numerous qualities required to be successful. The first & most important is to be kind."

Many people can help you to climb the ladder to success like your mom, dad, family & friends but foremost important is yourself. So give your best.

It's okay not to score 98 or 99, but if your ability is to get 80% & then if you score 60% then that's not your

CONGRATULATIONS

Microsoft Global Educator Exchange forum held in Redmond, WA (USA). 249 educators of the world participated in this forum. Laxmanbhai Chaudhari has won an Office Mix Award.

WORKSHOP ON "JAPANESE 5S PHILOSOPHY"

Students of Tripada groups of schools had attended a workshop on "Japanese 5s philosophy". It was organized in three different sessions. The first session included Time Management which was presented by Shri B. N. Dastur. The second session included some Japanese video clips. The clips showed students cooking, serving, cleaning with full zeal and enthusiasm. All the work were carried out with hundred percentage involvement. The third session started with 5s Philosophy by Mr. Divya Kumar. In this session, students learnt all the five S Philosophy. It means how to remain organized. 5s are- Seiri-To sort out - Seiton- set in order - Seiso- To clean - Seiketsu- Standardize - Shitsuke- self Discipline. The children understood that if they keep everything organized it will help them to improve their efficiency.

SCHOOL...

THE FUNDAMENTAL PILLAR

THIS PICTURE REPRESENTS SYMBLOZES

The first day of the school after a long summer vacation has a mixed feeling, the excitement of meeting friends, teachers, all the talks and events to share and on the other hand, again, the school system, regular classes, homework, extracurricular activities, punishments and above all achieving targets.

The students, parents and the teachers have their own agendas for the academic year. The most important thing is to understand that students, parents and the teachers have to work together for fruitful results. Everybody has to work 100%, fulfill their responsibilities at the same time acknowledge and respect each other.

The child is emotionally connected to the parents, teachers and the school. The role of the parents is to give a positive outlook of the school to their children of any age, explain them that school is a place to learn and educate themselves and move ahead. If the parents get pressurized by the school and its work, the child is ought to feel the same.

The new academic year has a whole new set of agendas, curriculum and a set of targets and rules for the teachers to build up students in the best possible ways. It is a big responsibility to deliver knowledge, morals, ethics, and physical health via

sports as well as create a need to participate in various quiz and competitions and help the students to be winners. Exposing and involving students in the process and helping them to be responsible and to be active participants give big results.

The students are the prime person and the center of the school around whom the parents and teachers revolve to give them a better future. The starting of a new academic year is always an excitement for the students. The mind is filled with numerous thoughts, friends, talks, fun and work. Each year opens the door for opportunities. Learning the lessons, good habits and self discipline promotes good results. It is important to set a goal at the starting of the year so that each day can be planned for the same. Discipline always gives results but self discipline gives achievement and satisfaction. Few things if taken into consideration can be of great help.

Key to success:

- Be regular
- Clarify doubts with teachers for profound learning.
- Compete with self not with your friends.
- Don't focus on to be the best but just be your best.

- Do participate in co - curricular activities, sports, quiz and competitions. It grooms you overall.
- Never blame anybody for your bad results or failure of any kind, you loose your power.
- Take charge of yourself.
- Be open to learning and guidance.
- Be a team player

The three segments of School are students, teachers and parents. All the three has to work together and cooperate to build bright students of tomorrow. It is a team work where each one is a leader of his own at the same time follower of each other. If this is understood, accepted and followed it gives ultimate results and bright children which parents always desire, successful students which teachers always dream of and at the same time students get their own identity full of confidence with success mantra.....

School is the fundamental pillar for successful career and life as a whole, so make most of it and enjoy schooling.

FIND THE DIFFERENCE

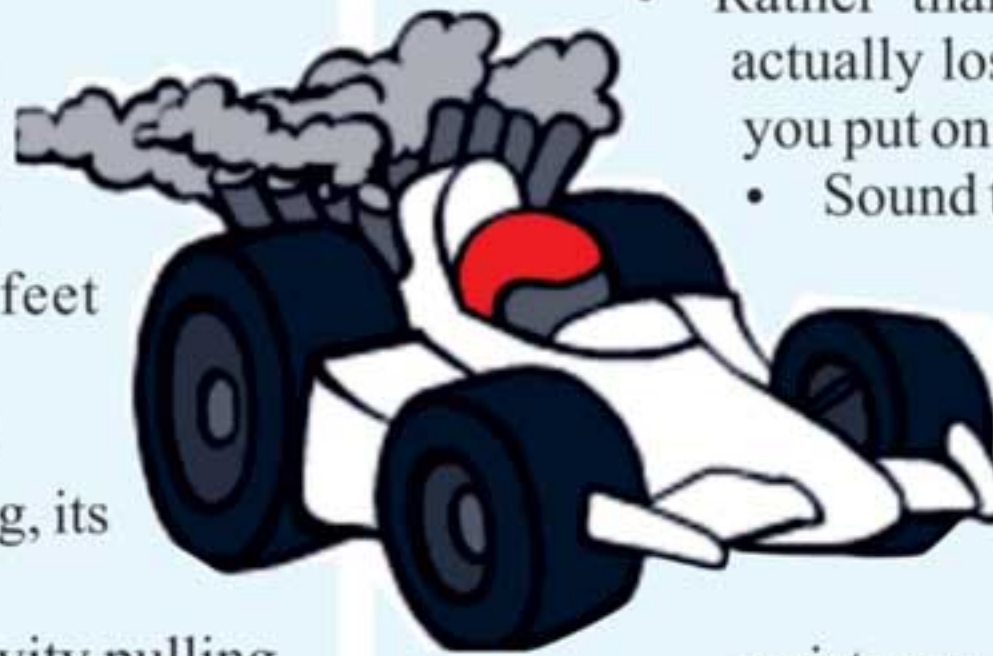

FUNNY SCIENCE FACTS

- Rabbits and parrots can see behind themselves without even moving their heads!
- Butterflies taste food by standing on top of it! Their taste receptors are in their feet

unlike humans who have most on their tongue.

- Most of the dust in your home is actually dead skin! Yuck!
- Although the Stegosaurus dinosaur was over 9 metres long, its brain was only the size of a walnut.
- Humans get a little taller in space because there is no gravity pulling them down.
- Because of the unusual shape of their legs, kangaroos and emus struggle to walk backwards.
- A hippopotamus may seem huge but it can still run faster than a man.
- Even if an analog clock is broken, at least it shows the correct time twice a day.
- Sneezing with your eyes open is impossible.
- The trickiest tongue twister in the English language is apparently "Sixth sick sheik's sixth sheep's sick". Give it a try and see for yourself.

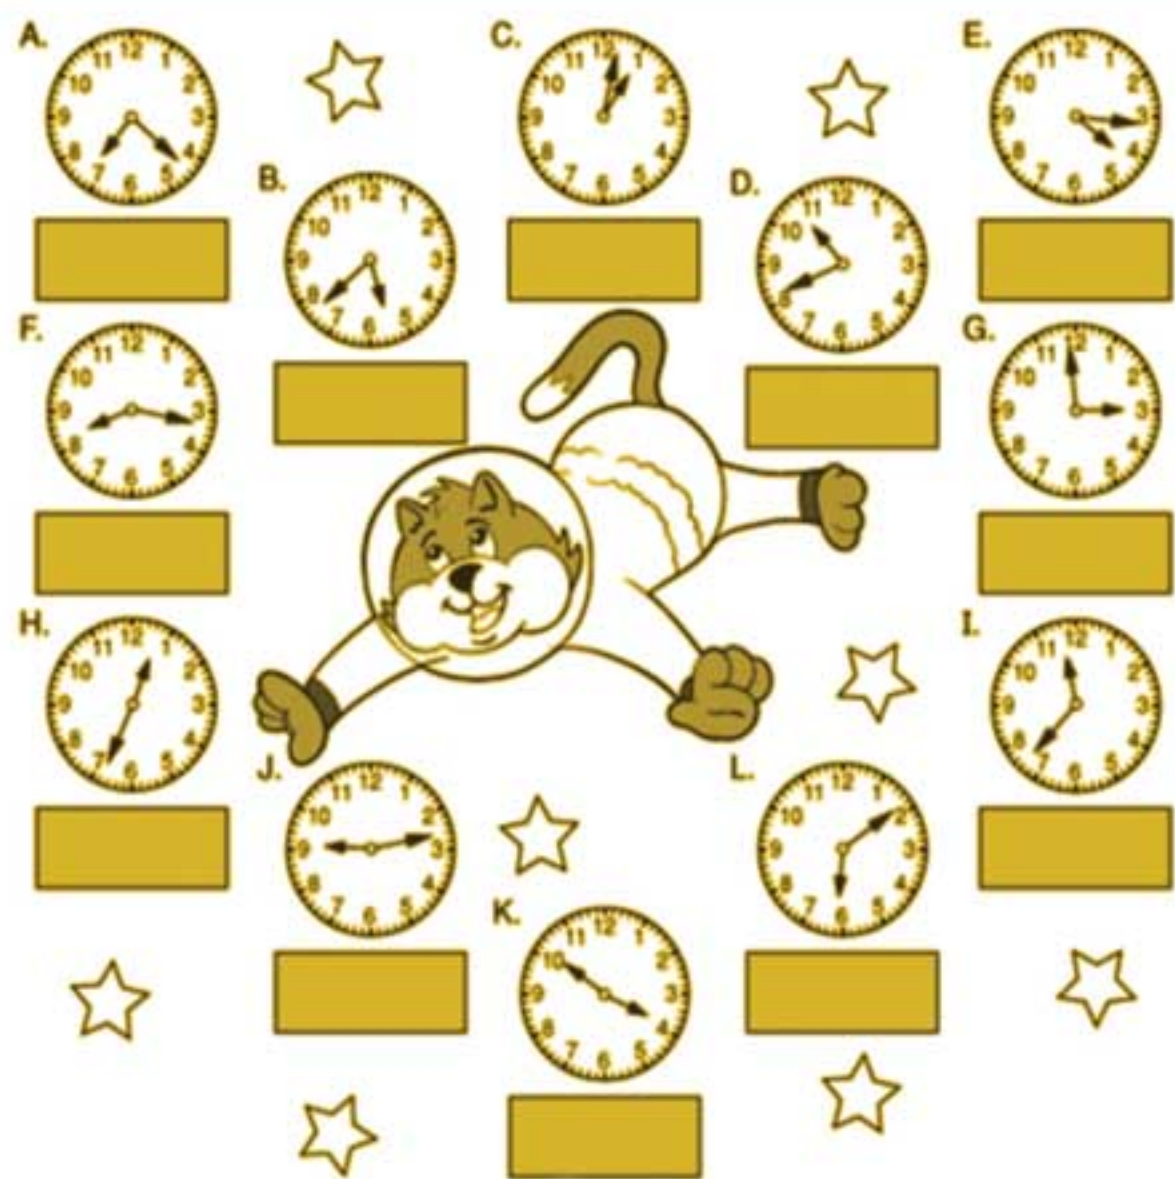

resistance.

- The noise that is thunder is created when the air around lightning gets rapidly heated and expands at a rate faster than the speed of sound.
- Rather than putting on weight from eating celery you actually lose it, you burn more calories from chewing than you put on from the food itself.
- Sound travels 4 times faster in water than it does through air.
- Cranberries can be tested for ripeness by bouncing them, if they are ripe they should have a bouncing quality.
- Travelling at 80 kilometres per hour, a car uses half its fuel to overcome wind resistance.
- The largest living structure on Earth is the Great Barrier Reef. Found in Australia, it is over 2000 kilometres long.
- The QWERTY keyboard layout used on most computers was invented way back in the 1860's.
- Some types of bamboo can grow nearly a metre a day!
- Diamonds are the hardest known substance.
- Light from the sun can reach a depth of 80 metres in the ocean.
- When you crack a whip, it makes a loud noise because the tip is actually moving faster than the speed of sound!

5. The shape of DNA is known as?
6. The flow of blood through your heart and around your body is called?
7. The bones around your chest that protect organs such as the heart are called what?
8. What is the name of the long pipe that shifts food from the back of your throat down to your stomach?
9. True or false? Your ears are important when it comes to staying balanced.
10. The outside layer of skin on the human body is called the?

ANSWERS OF LAST MONTH

1. The cerebrum 2. Iris 3. Melanin 4. Quadriceps 5. True 6. Keratin 7. The skin 8. Bone marrow 9. False (there are 206) 10. 2

FEAR VS RESPECT

Long time ago very cruel king named Virat Singh was ruling the city of Vijay Nagar. All citizens were scared because of his cruelty.

Virat has a dog named Jack, which he used to love more than anything. One fateful morning Jack died. Virat Singh organized last rites for the dog; entire city came to the cremation ground. Virat Singh was very happy to see that people love him so much and he felt he is the most popular king in the world. After a few days Virat Singh died, but no one came for his funerals.

Moral: Respect is something you have to earn, you cannot force it on others to respect you. There is a thin line between Fear and Respect, every one of us should understand it and make necessary corrections in our personalities.

HAPPY BIRTHDAY DIDI

A damsel of my life
The best of her social life
Always perceptive towards her sibling
And never is a jinx

Is always my reward
She is never in my bed
I know her from head to toe
She is never my foe

My mother, My father
At times even a brother
Acquiesce and also nixes
She is a cocktail of all mixes

She is a divinity
And is also pretty
She is a flood
And even my blood

My life belongs to her
Hers is with me
She is a sis
And even is a queen

Life without a sis
Is a life without all mix
India is a ton
So, it needs a sis like a friend

TRYING TO BE HAPPY

YESTERDAY WHEN

I was trying to be happy
I loved those who loved me
I respected those who respect me
I smiled at those who smiled at me
I helped those who help me
I hated those who hate me
But I was sad and bad, and I was called selfish.

TODAY WHEN

I sit alone in the night
The glittering stars from
The clear blue sky
Stared at me and smiled at me
The cool breeze whispered to me
That you are happy. I said "yes!"
Hoping I am on the way
Like a honey bee searching blossoms

BECAUSE

I love those who hate me
I respect those who never respect me
I help those who never help me
I smile at those who never smile at me
I am generous and kind full too
Those who are strangers to me.
